

Home wallbox, up to 7/22 kW (single/three phases)

Maximum output power: 7 kW (single phase), 22 kW (three phases)

Maximum output current: 32A max. | Cable length: 3 m / 5 m

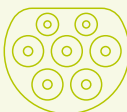

Comfortable and easy to use home wallbox for your garage. From now on, you don't have to look for a smart charging station near your area, you can bring it right into your house. Compact, but safe construction gives you the ability to charge your vehicle right in your garage. WiFi connection and Smart features ensures comfortable usage of the wallbox, using an mobile app. The Plug Type 2 connector is suitable for every commonly used electric car and the 0 to 7 kW output power ensures fast and effective battery charging. Easy installation and original design for a price that won't break your bank.

Details:

- Output power of one connector: 7 kW/22kW
- Connector: 1 x Plug Type 2
- Number of vehicles able to charge at the same time: 1
- Certificate: CE
- Input voltage: 230/400V 50Hz
- Maximum charging current: 32A
- Temperature range: -25 °C - +45 °C
- Humidity: max. 95%
- Communication: WiFi/GPRS
- Communication protocol: EJOIN protocol/OCPP 1.6
- Protection level: IP54
- Dimensions: 380 x 235 x 120 mm

Available features of a mobile app:

- ✓ Option of a timer – you can set up a time for charging
- ✓ Option of controlling the wallbox power
- ✓ Option of getting a full advantage of using a low tariff electric energy
- ✓ Communication with your photovoltaic system to give you the maximum ability for spare energy usage
- ✓ Electric energy consumption monitoring through graphs
- ✓ Monitoring of approximate charging level of your vehicle
- ✓ Numerous kinds of notifications, based on your setting

Connector Plug Type 2
