

Optional features of ejoin charging stations

Registration plate scanner

Scanner is suitable for every ejoin charging station for indoor and outdoor usage, such as public parking lots, hotel parking lots, gas stations, rest stops or mall parking lots.

Scanner makes it possible to charge vehicles the Plug to Charge way, which means, no manual authorization is needed. Authorization is made automatically, by scanning the registration plate, so users can just plug in the cable and charge.

Features:

- Accuracy: 99%
- Supports every EU country
- Shows plate number on a screen
- Scans within 3 to 5 seconds
- Scans during a day and during a night
- Scans to a distance from 1,3 to 5 meters
- Installation to a height from 100 to 140 cm
- Detects presence of a car, color and a plate number
- Can be installed on every ejoin charging station
